## Meet the team and their banners.

Imagine the symbol for a sign as a flag, a banner that let's everyone know what side a house or planet is on? The forthright Aries, or maybe diplomatic Libra?

Here are the signs, their symbol, technically called a glyph, and some of their qualities, if you get a little lost, think about the thing that represents the sign's energy? Leo is lions, Taurus is the bull and so on. . . .

## Elements within the signs - colouring in the wheel

You can colour around each sign on the wheel using a colour representing each element, starting with Aries  $\gamma$ , (use your legend to find it) in red and then Taurus in Green, Gemini in yellow and Cancer in blue. Then continue all the way round using the same order. This gives you three sections of each colour.

### FIRE

Aries, Leo, and Sagittarius

### EARTH

Taurus, Virgo, and Capricorn

### AIR

Gemini, Libra, and Aquarius

### WATER

Cancer, Scorpio, and Pisces

**FIRE** is perhaps the most ancient symbol of divinity. Fire is a living principle of duality, providing light and heat to aid humankind, while at the same time being a force of death and destruction. The ancients believed that fire could lie hidden in a piece of wood. By rubbing two pieces together the fire could often be coaxed from the wood. It's also in you when you get 'fired up' by a creative project, get angry with someone who isn't listening, it's fire, in the form of desire. It's, Aries, Leo, and Sagittarius.

**EARTH** is the element of form, binding and manifestation. The element of earth is the lowest in vibratory rate of the four elements, you're standing on it. It's practical and steady, it supports and allows for growth. It's about health, wealth and wellbeing. When someone is very earthy, they can sometimes be described as being stubborn, immovable or, perhaps, caught up in making money at the expense of everything and everyone one around them. It's also about food and cuddles – we just can't do without it! It's Taurus, Virgo, and Capricorn.

**AIR** is commonly associated with mental activity, communication and chatting. It's the element that governs the thought patterns you produce and the images you create in life. We have all heard that every thought is a thing; that thing would be carried in the wind. Someone who is talkative, could be termed as being air, but airy-fairy is something completely different! Someone who lives eternally in their head will not come down to earth too often, not recommended for practical matters. It's Gemini, Libra, and Aquarius.

**WATER** is an element associated with emotions. Think about tears, they come when we get emotional. It's also deceptively strong; water will always win, even against rock it will gently carve its way through and get to where it wants to be. Water, your emotions, is a very powerful force and when you listen to them they can guide you using water's biggest tool: your intuition. This is the land of your subconscious mind, it's Cancer, Scorpio, and Pisces.
